College has fully air-conditioned library accommodates more than 160 students and includes a dedicated e-learning area with computers and Wi-Fi. It offers access to 31,000 books through OPAC and Web OPAC. College library also has subscription to NLIST, providing students and faculty with access to a vast repository of e-resources, including e-books, e-journals, and research papers. The college website features links to open resources for books, novels, and digital libraries, further expanding the access to a wide range of educational materials and literature.

The institutional library utilizes web-based Integrated Library Management Software, automating core functions with a minimalist interface to enhance workflow. Library users can log in using individual credentials from any networked computer within the library. Admin (librarian) may access the entire range of features in order to organize library work, while other users (students, faculty and other staff) can access the functions that would be most relevant to them, such as search options, library holdings, their individual accounts, etc. It carries out the execution of core areas of library operations such as:

- ❖ Inventory management (Cataloguing, acquisition, indexing),
- ❖ Bar code of books, journals and documents,
- ❖ Online Public Access Catalogue (OPAC) for searching library documents by the users,
- ❖ Membership creation,
- ❖ Circulation (Check-in/check-out, reservation),
- ❖ Periodic report generation of library transactions,
- ❖ Library Administration.

The library is overseen by the Library Advisory Committee (LAC), which ensures its effective functioning. Additionally, the Students Library Advisory Committee (SLAC) monitors various library activities, organizes events, and conducts annual book exhibitions. To gauge library usage, the footfall count of both teachers and students is recorded regularly. This data helps assess the library's popularity and engagement. The library also offers a Book Bank facility for economically disadvantaged students, enabling them to access necessary study materials. Furthermore, students and staff members are encouraged to recommend books at any time, contributing to the library's diverse and relevant collection.

LOCAL OPAC

The Local OPAC with a dedicated computer is kept in the library to provide users within the library with a user-friendly interface to search and access the library's collection, including books, journals, multimedia, and other resources.

3. SUBSCRIPTION TO E-RESOURCE AND JOURNALS

SUBSCRIPTION TO N-LIST

The institution has a subscription to N-LIST (National Library and Information Services Infrastructure for Scholarly Content). N-LIST is an initiative by the Ministry of Education (formerly Ministry of Human Resource Development) under the Government of India. It provides access to a wide range of scholarly e-resources, including e-books, e-journals, and databases, to participating institutions.

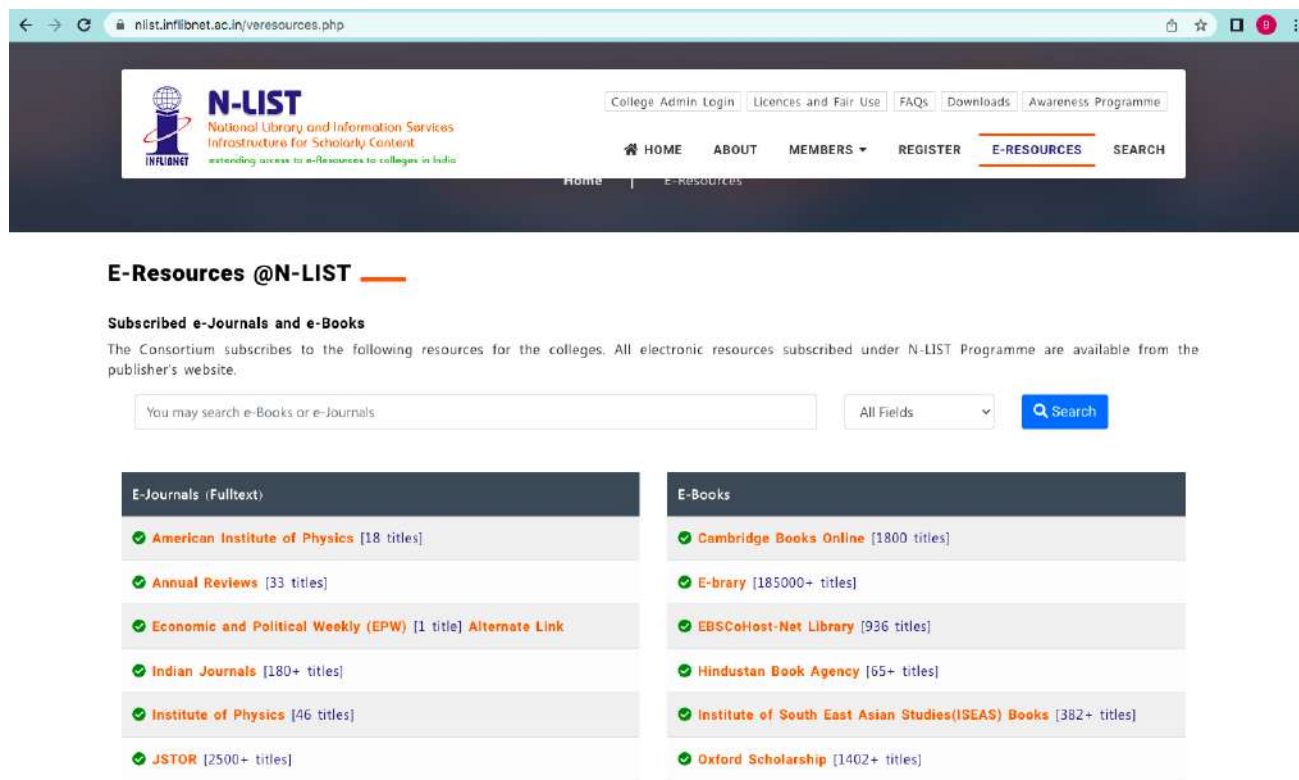

The screenshot shows the N-LIST website interface. The header includes the N-LIST logo and navigation links: HOME, ABOUT, MEMBERS (selected), REGISTER, E-RESOURCES, and SEARCH. Below the header, there is a list of member institutions. The entry for Nirmala Memorial Foundation College of Commerce & Science is highlighted with a dashed orange box. The details for this institution are as follows:

- ✓ **Nirmala Memorial Foundation College of Commerce & Science** [University of Mumbai, Mumbai]

4. LIBRARY UTILIZATION

The library diligently keeps track of the footfall count of students and teachers, ensuring the number of individuals visiting and utilizing its resources and services.

A. Students' Footfall Count

The library employs a software system to maintain and track the footfall count of students, generating comprehensive reports that provide valuable insights into the number of students who visit the library. This software aids in monitoring library usage patterns and helps in understanding the frequency of student engagement with the library's resources and facilities.

B. Teachers' Footfall Count

The library's footfall count of teachers, maintained through a manual register, provides valuable insights into their visits, tracking their frequency and assessing the library's support for academic and research needs.

6. METHOD OF COMPUTING PER DAY USAGE OF LIBRARY

The library uses desktop-based software to track and analyze student footfall (the number of students visiting the library). This software provides various features such as generating reports with graphs to display different aspects of student footfall. Here's a breakdown of the features you mentioned:

- **Daily Student Footfall:** The software records and displays the number of students who visit the library each day. This information can give insights into peak hours, busy days, and patterns of library usage.
- **Reports by Class:** The software allows generating reports that categorize student footfall based on their classes or courses. This can help identify which classes are more likely to use the library and potentially indicate specific academic interests or needs.
- **Reports by Day and Month:** The software can create reports that show student footfall trends on a daily and monthly basis. This can help identify monthly patterns or fluctuations in library usage.
- **Custom Date Range Reports:** The software enables generating reports for specific date ranges, which could be useful for comparing footfall during different semesters, holidays, or special events. This feature allows for a more customized analysis of student behavior.
- **Graphical Representation:** The software generates graphical representations, such as graphs and charts, to visually depict the student footfall data. Graphs can make it easier to understand trends and patterns in library usage over time.
- **Customizable Reports:** The software allows customization of the generated reports, which means users can select specific parameters, date ranges, and visualization options to tailor the reports to their needs.
