HARD SKILLS Vs SOFT SKILLS

Hard skills are skills where the rules stay the same regardless of which company, circumstance or people you work with.

In contrast, **soft skills** are self management skills and people skills where the rules changes depending on the company culture and people you work with.

Workshop on “Profile Building for Higher Education”

The banner features the CareerLabs logo (IN PARTNERSHIP WITH) and the Nirmala Memorial Foundation logo (COLLEGE OF COMMERCE & SCIENCE). The main text reads: "CareerLabs is hosting a satellite (virtual) seminar exclusively for the students of NIRMALA MEMORIAL FOUNDATION COLLEGE OF COMMERCE AND SCIENCE". Below this, it asks "Do you want to learn" and lists three topics: "How to build your profile to get into MIT/Stanford/Harvard?", "How to maximize your scholarships for top universities abroad?", and "How to Crack the toughest verbal questions within 60 seconds?". It then states "Attend a workshop on 'Profile building for Higher Education'". At the bottom, it introduces the speaker: "By PN Santosh, Co-Founder BYJU'S (CEO & Founder - CareerLabs, Ex- ISB Ex McKinsey, GMAT 780 Scorer)". Logos for ISB and McKinsey & Company are also present.

DEFENCE

Do Midget Submarines Fit Into Indian Navy's Littoral Defence Plans?

Vaibhav Agrawal

The Indian Navy (IN) has not shown much interest in the program despite their requirement for two midget submarines initially and three at later stages to strengthen its under-water capability for covert operations and surveillance missions in shallow waters by the Marine Command (MARCOM), but SOV-400 doesn't seem to fit the bill.

INV-400 is a new midget submarine design from Larsen & Toubro that was displayed at the Def Expo-2022. L&T is currently preparing to market its product abroad.

The company will continue improving its design and capabilities to draw customers from the export market. According to open sources, L&T has no further plans to develop prototypes due to the high cost required for their manufacturing without getting support from the Indian Navy.

AN AGE-OLD WAIT FOR PROCUREMENT

The Indian Navy still keeps quiet about its needs despite its 2009 plans to be the first to acquire Midget submarines.

According to open sources, the Navy began acquiring these vessels in 2005 and sent a Request for Proposal (RFP) to Indian shipyards, including Hindustan Shipyard Limited (HSL), and IPSCO shipyards. According to another report, the Navy initially only intended to purchase four of these ships, but later on, the number of indications may have increased.

Following the 2015 terror attacks in Mumbai in which the attackers hid behind an Indian fishing boat and killed its crew before sailing up the coast of the city to infiltrate districts to reach Bandra Park and the Sassoon Dock, a short distance from the city's Gateway of India monument, it was claimed that the Navy indicated these midgets as part of efforts to improve its operational capabilities.

Hindustan Shipyard Limited (HSL) was nominated in 2016 to receive the \$400 million contract to construct two midgets, and the tender was scheduled to be officially awarded one month later.

MIDGET SUBMARINES FOR INDIA

These submarines are typically smaller vessels with fewer than 100 tonnes displacement, with a crew of only two to seven people, and are primarily employed for special operations. They frequently collaborate with mother ships from which they are launched and recovered, and also house the crew and support staff.

They are sometimes called "MIM" or "Submarine Delivery Vehicle" in India. This includes two-person clandestine types of vessels with which the Indian Navy has a long history of demonstrated proficiency, which allows marine commandos access to areas that other submarines cannot reach due to shallow waters. "Stealth Operation Vessels" (SOVs) are also referred to as hybrid low-observable, submarine-com-surface vessels that combine the advantages of stealth and high speed from a combination of SOV and high-speed surface vessels.

A crucial and long-overlooked addition to India's marine commando (MARCOM) capability is midget submarines.

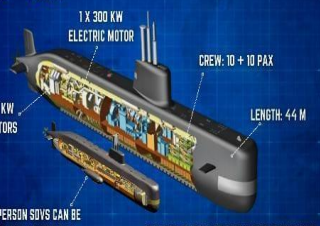

ADVERSARIES' ARSENAL

The new midget submarine used by Pakistan's special forces for conducting covert operations and the likely success for a joint project to build new conventional submarines.
