NOTICE

FREE THALASSEMIA SCREENING CAMP

Thalassemia is a hereditary blood disorder that affects hemoglobin production, leading to anemia and related health complications. Early detection of carriers is essential for genetic counseling, preventive care, and making informed decisions regarding future family planning.

As part of this important initiative, blood samples will be collected on-site, and the test results will be shared directly with the students. This screening is aimed at raising awareness about Thalassemia and supporting timely medical guidance for better health outcomes.

The screening is being organized by the **National Service Scheme (NSS)** to promote awareness and provide valuable resources for those who may be at risk.

- **Day & Date:** Friday, 27th June, 2025
- **Time:** 09.00 am to 2.30 pm
- **Venue:** Basement area (Nirmala Hall)

Students can avail the benefit by registering themselves via following QR code.
